It ' s hard to imagine a history of British engineering without Rolls-Royce: there would be no Silver Ghost, no Merlin for the Spitfire, no Alcock and Brown. Rolls-Royce is one of the most recognisable brands in the world. But what of the man who designed them? The youngest of five children, Frederick Henry Royce was born into almost Dickensian circumstances: the family business failed by the time he was 4, his father died in a Greenwich poorhouse when he was 9, and he only managed two fragmented years of formal schooling. But he made all of it count. In Sir Henry Royce: Establishing Rolls-Royce, from Motor Cars to Aero Engines, acclaimed aeronautical historian Peter Reese explores the life of an almost forgotten genius, from his humble beginnings to his greatest achievements. Impeccably researched and featuring almost 100 illustrations, this is the remarkable story of British success on a global stage.

The Magic of a Name tells the story of the first 40 years of Britain ' s most prestigious manufacturer - Rolls-Royce. Beginning with the historic meeting in 1904 of Henry Royce and the Honourable C.S. Rolls, and the birth in 1906 of the legendary Silver Ghost, Peter Pugh tells a story of genius, skill, hard work and dedication which gave the world cars and aero engines unrivalled in their excellence. In 1915, 100 years ago, the pair produced their first aero engine, the Eagle which along with the Hawk, Falcon and Condor proved themselves in battle in the First World War. In the Second the totemic Merlin was installed in the Spitfire and built in a race against time in 1940 to help win the Battle of Britain. With unrivalled access to the company ' s archives, Peter Pugh ' s history is a unique portrait of both an iconic name and of British industry at its best.
