National Qualifications Internal Verification Toolkit What is internal verification and how can it help you? Internal verification is an approach to quality assurance based on peer support and review that enables you to integrate quality into internal assessment from start to finish.

This volume draws together research originally presented at the 2015 Future of Journalism conference at Cardiff University, UK. The conference theme, "Risks, Threats and Opportunities," highlighted five areas of particular concern for discussion and debate. The first of these areas, "Journalism and Social Media," explores how journalism and the role of the journalist are being redefined in the digital age of social networking, crowd-sourcing and "big data," and how the influence of media like Twitter, Facebook, YouTube, Instagram, and Reddit affects the gathering, reporting or consumption of news? "Journalists at Risk" assesses the key issues surrounding journalists' safety and their right to report, as news organizations and their sources are increasingly targeted in war, conflict or crisis situations. The third area, "Journalism Under Surveillance," asks what freedom of the press means in a post-Snowden climate. What are the new forms of censorship confronting journalism today, and what emergent tactics will help it to speak truth to power? "Journalism and the Fifth Estate" examines the traditional ideals of the fourth estate, which risk looking outdated, if not obsolete, in the modern world. How much can we rely on citizen media to produce alternative forms of news reporting, and how can we reform mainstream media institutions to make them more open, transparent and accountable to the public? The final area, "Journalism's Values," asks how journalism's ethical principles and moral standards are evolving in relation to the democratic cultures of communities locally, regionally, nationally or internationally. What are the implications of changing priorities for the education, training and employment of tomorrow's journalists? Every chapter in this volume engages with a pressing issue for the future of journalism, offering an original, thought-provoking perspective intended to help facilitate further dialogue and debate. The chapters in this book were originally published in special issues of Digital Journalism, Journalism Practice, and Journalism Studies.

The New News offers an approachable, practical guide to the 21st-century newsroom, equipping journalists with the skills needed to work expertly, accurately, and efficiently across multiple media platforms. Emphasizing the importance of verification and authentication, the book shows how journalists adapt traditional practices of information-gathering, observation, interviewing, and newswriting for online publications. The text includes comprehensive coverage of key digital and multimedia competencies - capturing multimedia content, "doing" data journalism, mobile reporting, working in teams, participating with global audiences, and building a personal brand. Features developed exclusively for this book include innovative visuals showing the multimedia news structures and workflows used in modern newsrooms; interviews with prominent journalists about their experiences in contemporary journalism; a glossary of up-to-date terms relevant to online journalism; and practical exercises and activities for classroom use, as well as additional downloadable online instructor materials. The New News provides excellent resources to help journalism students and early-career professionals succeed in today's digital networked news industry. The authors are donating all royalties to nonprofit LION's programs to support local online news publications.

Every year, more than 20 million students and parents file the Free Application for Federal Student Aid (FAFSA), the gateway to federal, state and school financial aid. Families often worry about making costly mistakes, but this step-by-step guide provides expert advice and insights to:

- Maximize eligibility for student aid
- Avoid common errors
- Complete the form quickly, easily and accurately

Praise for Filing the FAFSA: I found Filing the FAFSA to be an up-to-the-minute, accessible and readable resource for those with a keen interest in the current federal application for student financial aid. "Nancy Coolidge, Office of the President, University of California Families need a guide that breaks down the application form into logical sections. Filing the FAFSA is an important tool in removing some of the mystery surrounding the financial aid process. "Verna Hazen, Assistant Vice President and Director, Office of Financial Aid and Scholarships, Rochester Institute of Technology With the plethora of information on the subject of completing college financial applications, it's reassuring to find a guide that students, parents and even guidance counselors can look to for useful and accurate information. "Carlos Adrian, Associate Director, Financial Aid Compliance, Office of Financial Aid and Scholarship Programs, Syracuse University As a long-time financial aid professional, I am always looking for helpful tools to assist families in understanding the sometimes overwhelming process of applying for student financial aid for college. Filing the FAFSA is a tool that successfully combines the presentation of detailed information with easy to follow flow charts and summary boxes to guide families through the application process. It is filled with helpful hints and is a valuable resource for families navigating the complicated world of financial aid. "Diane Stemper, Executive Director, Office of Enrollment Services, Student Financial Aid, Ohio State University

As media becomes more readily available in the digital age, it also becomes more vulnerable to tampering and manipulation, making techniques for verifying reliable news and media sources essential. Understanding online technologies' role in shaping the media environment allows for insight into the correlations between the rapidly transforming media landscape and its unwanted effect on news and content tampering. Cross-Media Authentication and Verification: Emerging Research and Opportunities is a collection of innovative research on the methods and applications of verifying the newsgathering and publishing process. While highlighting topics including human authentication, information evaluation, and tampered content, this book is ideally designed for researchers, students, publishers, and academicians seeking current research on media authenticity and misinformation.

International shipping is currently at a crossroads. The decision of the International Maritime Organization (IMO) in April 2018 to adopt an Initial Strategy so as to achieve by 2050 a reduction of at least 50% in maritime greenhouse gas (GHG) emissions vis-à-vis 2008 levels epitomizes the last among a series of recent developments as regards sustainable shipping. It also sets the scene on what may happen in the future. Even though many experts and industry circles believe that the IMO decision is in line with the COP21 climate change agreement in Paris in 2015, others disagree, either on the ground that the target

is not ambitious enough, or on the ground that no clear pathway to reach the target is currently visible. This book takes a cross-disciplinary view of the various dimensions of the maritime transportation sustainability problem. "Cross-disciplinary" means that a variety of angles are used to examine the book topics, and these mainly include the technological angle, the economics angle, the logistics angle, and the environmental angle. The book reviews models that can be used to evaluate decisions, policy alternatives and trade-offs. For sustainable shipping, a spectrum of technical, logistics-based and market based measures are being contemplated. All may have important side-effects as regards the economics and logistics of the maritime supply chain, including ports and hinterland connections. The objective to attain an acceptable environmental performance, while at the same time respecting traditional economic performance criteria so that shipping remains viable, is and is likely to be a central goal for both industry and policy-makers in the years ahead. At the same time, policy fragmentation is likely to create distortions of competition and sub-optimal solutions. This book attempts to address these issues and identify better solutions. /divSustainable Shipping: A Cross-Disciplinary View includes chapters that cover many relevant topics. These include a general view of maritime transport sustainability, green ship technologies, information and communication technologies (ICTs) for sustainable shipping, green tramp ship routing and scheduling, green liner network design and speed optimization. Market based measures, oil pollution, ship recycling, sulphur emissions, ballast water management, alternative fuels and green ports are also covered. The book concludes by discussing prospects for the future, with a focus on the IMO Initial Strategy. "This book contains a unique wealth of information on sustainable shipping. The knowledge it provides is rigorous, complete, and well supported by statistics, technical reports, and scientific references. The treatment of the various topics is not only informative but also analytical and critical." "Gilbert Laporte, Maritime Economics & Logistics (12 May, 2020)

If everyone with a smartphone can be a citizen photojournalist, who needs professional photojournalism? This rather flippant question cuts to the heart of a set of pressing issues, where an array of impassioned voices may be heard in vigorous debate. While some of these voices are confidently predicting photojournalism's impending demise as the latest casualty of internet-driven convergence, others are heralding its dramatic rebirth, pointing to the democratisation of what was once the exclusive domain of the professional. Regardless of where one is situated in relation to these stark polarities, however, it is readily apparent that photojournalism is being decisively transformed across shifting, uneven conditions for civic participation in ways that raise important questions for journalism's forms and practices in a digital era. This book's contributors identify and critique a range of factors currently recasting photojournalism's professional ethos, devoting particular attention to the challenges posed by the rise of citizen journalism. This book was originally published as two special issues, in Digital Journalism and Journalism Practice.

Energy policies and management are of primary importance to achieve the development of sustainability and need to be consistent with recent advances in energy production and distribution. Progressing from an economy mainly focussed on hydrocarbons to one taking advantage of sustainable renewable energy resources requires considerable scientific research, as well as the development of new engineering systems. Energy fuels the world's economy. Diminishing resources and severe environmental effects resulting from the continuous use of fossil fuels has motivated an increasing amount of interest in renewable energy resources and the search for sustainable energy policies. Key difficulties to overcome often originate from the conversion of renewable energies (wind, solar, etc.) to useful forms (electricity, heat, fuel) at an acceptable cost, including impacts on the environment as well as in the integration of these resources into the existing infrastructure. A wide range of topics are covered by the works contained in this book. The collaboration of varied disciplines are involved in order to arrive at optimum solutions, including studies of materials, energy networks, new energy resources, storage solutions, waste to energy systems, smart grids and many others.

Digital Detectives: Solving Information Dilemmas in an Online World helps students become independent and confident digital detectives, giving them the tools and tactics they need to critically scrutinize web-based digital information to ascertain its authenticity, veracity, and authority, and to use the information in a discerning way to successfully complete academic tasks. Enabling students to select and use information appropriately empowers them to function at a higher level of digital information fluency, acting as discerning consumers of, and effective contributors to, web-based information. Offers a situated, problem-solving approach to deepen students' analytical and research skills Explores a practical, real-life dilemma that is typically experienced by undergraduates in the course of their academic work, especially those transitioning from secondary to third-level education Focuses on the authentic educational needs of undergraduates as expressed by educators, but also students themselves Addresses a specific central dilemma which is identified at the outset, but also uses the opportunity to reveal to students the broader contextual issues which frame the problem they are exploring
