~~Linear Algebra Primer For~~

This book, modestly titled as a "linear algebra primer", is, in fact, a well written comprehensive introduction to the uses of linear algebra techniques in finance. The emphasis lies on concrete, computer software implementable linear algebra with a wide range of specific applications to portfolio construction, market data

Linear Algebra – A Primer. Posted on June 19, 2011 by j2kun. Story Time. Linear algebra was founded around the same time as Calculus (think Leibniz, circa 1700) solely for the purpose of solving general systems of linear equations. The coefficients of a system were written in a grid form, with rows corresponding to equations and columns to ...

1 Why is it called "Linear Algebra"?

Linear algebra is the study of linear functions/equations. A linear equation is one in which each term is either a constant or the product of a constant and the first power of a single variable. A linear function is one which obeys the two properties  $f(x) + f(y) = f(x+y)$  and  $f(cx) = cf(x)$ .
