Nuclear Cardiology (ABNC). It contains over 200 questions. The largest segment covers coronary disease examples with correct diagnostic implementation (procedural planning). Other sections on physics, artifacts, prognostic data, anomalies, and noncoronary testing are also included. And with increasing focus on guidelines, questions regarding the ACC-ASNC "appropriateness criteria" have been included.

Sitting an accreditation examination is a daunting prospect for many trainee echocardiographers. And with an increasing drive for the accreditation of echocardiography laboratories and individual echocardiographers, there is a need for an all-encompassing revision aid for those seeking accreditation.
