The creation of the Force Intervention

Brigade (FIB) as the sharp tactical edge of the United Nations Stabilisation Mission in the Democratic Republic of the Congo (MONUSCO), tasked with the neutralising of armed groups, was a watershed moment in the history of modern peace missions. What was more significant was that sub-Saharan national leaders were instrumental in the creation of the FIB (South Africa, Tanzania and Malawi), but lacked the resources to deploy such a force and consequently the brigade was deployed under the banner of the UN. With the legacy of an African Renaissance, and its role in the conception of the FIB, South Africa remains a critical player in international peace and security in sub-Saharan Africa, and therefore holds a key strategic role in achieving

the FIBs objectives. This comes at a critical time where blue helmets are increasingly exposed to complex and challenging security contexts. The aim of this work is to provide a conceptual model for South African military future operations and UN offensive peacekeeping operations. In this undertaking, a layer of military and Clausewitzian theory is added to offensive peacekeeping operations. Furthermore, there are sections on operational constructs (capstone and operating concepts), doctrine and structural elements, as well a section on mine action. This book contributes towards an understanding of the nature of modern strategy through the lens of UN offensive peacekeeping operations and provides insights into operational challenges.

The protection of civilians is a highly topical issue at the forefront of international discourse, and has taken a prominent role in many international deployments. It has been at the centre of debates on the NATO intervention in Libya, UN deployments in Darfur, South Sudan, and the Democratic Republic of the Congo, and on the failures of the international community in Sri Lanka and Syria. Variously described as a moral responsibility, a legal obligation, a mandated peacekeeping task, and the culmination of humanitarian activity, it has become a high-profile concern of governments, international organisations, and civil society, and a central issue in international peace and security. This book offers a multidisciplinary treatment of this important topic, harnessing

perspectives from international law and international relations, traversing academia and practice. Moving from the historical and philosophical development of the civilian protection concept, through relevant bodies of international law and normative underpinnings, and on to politics and practice, the volume presents coherent cross-cutting analysis of the realities of conflict and diplomacy. In doing so, it engages a series of current debates, including on the role of politics in what has often been characterized as a humanitarian endeavour, and the challenges and impacts of the use of force. The work brings together a wide array of eminent academics and respected practitioners, incorporating contributions from legal scholars and ethicists, political commentators,

diplomats, UN officials, military commanders, development experts and humanitarian aid workers. As the most comprehensive publication on the subject, this will be a first port of call for anyone studying or working towards a better protection of civilians in conflict.

This invaluable guide provides short scenarios of typical international involvement in peace missions, natural disasters, and stability operations, as well as an introduction to the organizations that will be present when the international community responds to a crisis.

One of the most vexing issues that has faced the international community since the end of the Cold War has been the use of force by the United Nations peacekeeping forces. UN intervention in civil wars, as in Somalia, Bosnia and Herzegovina, and Rwanda, has thrown into stark relief the difficulty of peacekeepers operating in situations where consent to their presence and activities is fragile or incomplete and where there is little peace to keep. Complex questions arise in these circumstances. When and how should peacekeepers use force to protect themselves, to protect their mission, or, most troublingly, to ensure compliance by recalcitrant parties with peace accords? Is a peace enforcement role for peacekeepers possible or is this simply war by

another name? Is there a grey zone between peacekeeping and peace enforcement? Trevor Findlay reveals the history of the use of force by UN peacekeepers from Sinai in the 1950s to Haiti in the 1990s. He untangles the arguments about the use of force in peace operations and sets these within the broader context of military doctrine and practice. Drawing on these insights the author examines proposals for future conduct of UN operations, including the formulation of UN peacekeeping doctrine and the establishment of a UN rapid reaction force.

peacekeeping operations. Since the late 1940s, but particularly since the end of the cold war, peacekeeping has been a central part of the core activities of the United Nations and a major process in global security governance and the management of international relations in general. The volume will present a chronological analysis, designed to provide a comprehensive perspective that highlights the evolution of UN peacekeeping and offers a detailed picture of how the decisions of UN bureaucrats and national governments on the set-up and design of particular UN missions were, and remain, influenced by the impact of preceding operations. The volume will bring together leading scholars and senior practitioners in order to provide overviews and analyses of all

This is a new evaluation of the role, dynamics and challenges of intelligence in peacekeeping activities and its place in a much wider social, economic and political context. It assesses the role of coalition forces, law enforcement agencies, development institutions, and non-governmental organisations who have become partners in peace support activities. Peacekeeping Intelligence (PKI) is a new form of intelligence stressing predominantly open sources of information used to create Open Source Intelligence (OSINT), and that demands multi-lateral sharing of

intelligence at all levels. Unlike national intelligence, which emphasizes spies, satellites, and secrecy, PKI brings together many aspects of intelligence gathering including the media and NGOs. It seeks to establish standards in open source collection, analysis, security, counterintelligence and training and produces unclassified intelligence useful to the public. The challenges facing peacekeeping intelligence are increasingly entwined with questions of arms control, commercial interests, international crime, and ethnic conflict. This book will be of great interest to all students and scholars of military and security studies, intelligence and peacekeeping.
