The majority of maintenance manuals are customised for a specific fleet, i.e. specific to a particular airline. That way Boeing only provides information that is applicable to those aircraft and even with a given manual you need to be able to filter on applicability to ensure that specific maintenance information is applicable to a specific aircraft.

This manual brings large aircraft systems training to the entry level helicopter pilot. Richard Theriault is an experienced pilot and flight instructor with over 38 years of experience. He holds an Airline Transport Pilot and instructor certificates in both airplanes and helicopters. He has experience in a wide range of airplanes from the Piper J-3 to the B727 and helicopters from the R22 to the Bell 212.

The major objective of this book was to identify issues related to the introduction of new materials and the effects that advanced materials will have on the durability and technical risk of future civil aircraft throughout their service life. The committee investigated the new materials and structural concepts that are likely to be incorporated into next generation commercial aircraft and the factors influencing application decisions. Based on these predictions, the committee attempted to identify the design, characterization, monitoring, and maintenance issues that are critical for the introduction of advanced materials and structural concepts into future aircraft.
