High Rise construction - Doka - The Formwork Experts. - Doka

SKW was very pleased with the concrete appearance and overall performance of the Doka formwork. Due to the high concrete temperatures that occur during the curing process, as well as the high ambient temperatures of the hot and humid summer months (96 degrees Fahrenheit), SKW decided to add liquid nitrogen to the concrete mix to lower the concrete temperature in an effort to delay the cure time to control the concrete shrinkage and minimize the possibility of cracking in the watertight ITT ...
