Tutorial on finding the probability of an event. In what follows,  $S$  is the sample space of the experiment in question and  $E$  is the event of interest.  $n(S)$  is the number of elements in the sample space  $S$  and  $n(E)$  is the number of elements in the event  $E$ . Questions and their Solutions  
Question 1

## Solutions

Solution A probability is always greater than or equal to 0 and less than or equal to 1, hence only a) and c) above cannot represent probabilities:  $-0.00010$  is less than 0 and  $1.001$  is greater than 1.
