Integrating recent research and developments in the field, this revised second edition introduces an easy-to-master strategy for developing and writing culturally sensitive case conceptualizations and treatment plans. Concrete guidelines and updated case material are provided for developing conceptualizations for the five most common therapy models: Cognitive-Behavioral Therapy (CBT), Psychodynamic, Biopsychosocial, Adlerian, and Acceptance and Commitment Therapy. The chapters also include specific exercises and activities for mastering case conceptualization and related competencies and skills. Also new to this edition is a chapter on couple and family case conceptualizations, and an emphasis throughout on trauma. Practitioners, as well as graduate students in counseling and in clinical psychology, will gain the essential skills and knowledge they need to master case conceptualizations.

"Case Studies in Multicultural Counseling and Therapy is a magnificent resource that will help create a greater bridge of understanding between the academic, research, and applied domains of the mental health professions." —From the Foreword by Thomas A. Parham, PhD, Vice Chancellor, Student Affairs, University of California, Irvine; Distinguished Psychologist, Association of Black Psychologists

An indispensable collection of real-life clinical cases from practicing experts in the field of multicultural counseling and psychotherapy

Case Studies in Multicultural Counseling and Therapy is a one-of-a-kind resource presenting actual cases illustrating assessment, diagnostic, and treatment concerns associated with specific populations. The contributors—well-known mental health professionals who specialize in multicultural counseling and psychotherapy—draw on their personal experiences to empower therapists in developing an individually tailored treatment plan that effectively addresses presenting problems in a culturally responsive manner. Providing readers with the opportunity to think critically about multicultural factors and how they impact assessment, diagnosis, and treatment, this unique book:

- Covers ethical issues and evidence-based practice
- Integrates therapists' reflections on their own social identity and how this may have influenced their work with their clients
- Considers the intersectionality of racial/ethnic, class, religious, gender, and sexual identities
- Contains reflection and discussion questions, an analysis of each case by the author, and recommended resources
- Includes cases on racial/ethnic minority populations, gender, sexuality, poverty, older adults, immigrants, refugees, and white therapists working with people of color

In this book, designed to increase mental health professionals' global literacy, authors from 33 countries demonstrate multicultural skills and competencies through case studies that illustrate approaches to counseling and psychotherapy in their countries. Following an introductory section on the use of case studies, chapters focus on a cross section of countries in Africa; Australia and Asia; Central, North, and South America; Europe; and the Middle East. Each case describes the client and his or her presenting concerns and includes a culture-sensitive assessment and treatment plan, an analysis and critical reflection of the case, and questions for discussion. The final chapter of the text presents a comparative analysis of the cases. *Requests for digital versions from the ACA can be found on wiley.com. *To request print copies, please visit the ACA website here. *Reproduction requests for material from books published by ACA should be directed to permissions@counseling.org.

This up-to-date, highly readable, theory-based, and application-oriented book fills a crucial void in literature on couple therapy. Few books in the couple therapy market bridge the gap between theory and practice; texts tend to lean in one direction or the other, either emphasizing theory and research with little practical application, or taking a cookbook approach that describes specific techniques and interventions that are divorced from any conceptual or theoretical base. However, couples therapy requires a high degree of abstract/conceptual thinking, as well as ingenuity, inventiveness and skill on the part of the therapist. *Case Studies in Couples Therapy* blends the best of all worlds: clinical applications with challenging and diverse couples that have been derived from the most influential theories and models in couples and family therapy, all written by highly experienced and respected voices in the field. In *Case Studies in Couples Therapy*, readers will grasp the essentials of major theories and approaches in a few pages and then see how concepts and principles are applied in the work of well-known clinicians. The case studies incorporate a wide variety of couples from diverse backgrounds in a number of different life situations. It is simultaneously narrow (including specific processes and interventions applied with real clients) and broad (clearly outlining a broad array of theories and concepts) in scope, and the interventions in it are directly linked to theoretical perspectives in a clear and systematic way. Students and clinicians alike will find the theoretical overview sections of each chapter clear and easy to follow, and each chapter's thorough descriptions of effective, practical interventions will give readers a strong sense of the connections between theory and practice.

Using compelling contemporary and classic cases, CASE STUDIES IN PSYCHOTHERAPY brings to life essential concepts and practices in psychotherapy. The Seventh Edition of this popular casebook features intriguing new cases added to illustrate Psychoanalysis, Client-Centered Therapy, Existential Therapy, Interpersonal Therapy, Contemplative Therapies, and Therapy in a Multicultural context. There's also an entirely new chapter on Positive Psychotherapy. The book maintains its parallel structure with the Tenth Edition of Wedding and Corsini's CURRENT PSYCHOTHERAPIES, providing you with the most comprehensive look at psychotherapy available today. All of these insightful cases are chosen for intrinsic interest, clarity of presentation, and the ability to most effectively demonstrate the basic techniques and methods of the theory being illustrated. This book represents a complete overhaul of a classic text for the twenty-first century. Loretta Bradley, and new co-author/editor Nicholas Ladany, have completely revised the material to reflect the most current research, theory, and practice available. In doing so, they have made Counselor Supervision, 3e a cutting-edge model of multicultural supervision. Primary supervision theories are reviewed and critiqued with the intent of informing supervisor practitioners, counselor educators, and supervisor trainees. Case studies are used throughout the book to illustrate the application of these theories to the practical issues that supervisors regularly encounter. The authors also include a focused discussion on the importance of the supervisory relationship and its influence on supervision process and outcome. Important changes and additions to the new edition include: -- Integration of multicultural issues in supervision throughout the book; -- An examination of the ethical and advocacy issues in supervision; -- An innovative chapter devoted to understanding and conducting research in

counselor supervision; -- New and relevant chapters on the supervision of school counselors, career counselors, and family counselors; -- An updated chapter on group supervision. Counselor Supervision is ideal for use as a textbook in counselor supervision courses. The book is also an outstanding professional development tool for administrative and clinical supervisors alike.
