"Sloane Jacobsen is the most powerful trend forecaster in the world ... and global fashion, lifestyle, and tech companies pay to hear her opinions about the future. Her recent forecasts on the family are unwavering: the world is overpopulated, and with unemployment, college costs, and food prices all on the rise, having children is an extravagant indulgence. So it's no surprise when the tech giant Mammoth hires Sloane to lead their groundbreaking annual conference, celebrating the voluntarily childless. But not far into her contract, Sloane begins to sense the undeniable signs of a movement against electronics that will see people embracing compassion, empathy, and 'in-personism' again"--

From assassinations to student riots, this is [a splendidly evocative account of a historic year]a year of tumult, of trauma, and of tragedy[ (Arthur Schlesinger Jr.). In the United States, the 1960s were a period of unprecedented change and upheaval[but the year 1968 in particular stands out as a dramatic turning point. Americans witnessed the Tet offensive in Vietnam; the shocking assassinations of Martin Luther King Jr. and Robert Kennedy; and the chaos at the Democratic National Convention in Chicago. At the same time, a young generation was questioning authority like never before[and popular culture, especially music, was being revolutionized. Largely based on unpublished interviews and documents[including in-depth conversations with Eugene McCarthy and Bob Dylan, among many others, and the late Theodore White]'s archives, to which the author had sole access[1968 in America is a fascinating social history, and the definitive study of a year when nothing could be taken for granted. [Kaiser aims to convey not only what happened during the period but what it felt like at the time. Affecting touches bring back powerful memories, including strong accounts of the impact of the Tet offensive and of the frenzy aroused by Bobby Kennedy]'s race for the presidency.] [The New York Times Book Review

This book analyzes the changing dynamics of competition and the emergence of deglobalization trends and processes. The authors begin by explaining the role of technology on globalization and its impact on competitive strategy. Then, they present a theoretical framework that outlines the connection between globalization and modern society. The book also delves into the shift toward deglobalization and addresses how the onset of the COVID-10 pandemic has accelerated the process. Concluding with a discussion of how the 4th Industrial Revolution has resulted in new paradigms for business, this book will fill a gap through its investigation of an emerging concept for scholars in international business.

Pub Dogs of London is a beautiful, charming coffee-table book of photographic portraits of the many and varied canine regulars of London's inimitable public houses. With a range of famous breeds as well as the expected scruffy mongrels, and with biographical profiles of each pub-visiting pooch, this is the must-have record of the capital's world-famous demi-monde. The book also includes some occasional humorous verse inspired by the images from poet Graham Fulton.

Revisits the largely forgotten story of how the McGovern campaign represented the zenith of sixties-style liberalism, and how its historic defeat still haunts Democrats to this day--and in the process identifies what Democrats must do before they can reassume their role as agents of progressive change.

George Stubbs is one of the greatest of British eighteenth-century painters, with a deep and unaffected sympathy for country life and the English countryside. This fully illustrated book outlines his career, followed by a catalogue raisonne (the first since Sir Walter Gilbey's short listing of 1898) of all his known works. One of the stickiest labels in the history of British art attached itself to Stubbs as 'Mr Stubbs the horse painter'. Over half of his paintings were of horses, each founded on the pioneering observations assembled (in 1766) in his book The Anatomy of the Horse; but Stubbs's wide-ranging subjects included portraits, conversation pieces and paintings of exotic animals from the Zebra to the Rhinoceros, as well as an extraordinarily sympathetic series of portraits of dogs.
